County(ies): Chatauqua

New York Region: Western New York
Assembly District: 150
Congressional District: 23
Senate District: 57

Total Locations: 14,447
Construction Miles (Fiber): 164
Wireless Hubs: N/A
Square Mileage (Wireless): N/A

Project Summary

The City of Jamestown is partnering with EntryPoint Networks and Quanta Telecommunication Services to build an open-access fiber network to serve all 14,447 homes and businesses served by the Jamestown public utility. The Jamestown Board of Public Utilities will own and operate the infrastructure, with EntryPoint Networks providing telecom equipment and software and Quanta managing design and construction. This project will address longstanding concerns in the community over broadband reliability and affordability. Along with lowering consumer costs and enhancing network performance and reliability, the network will drive economic opportunity, improve education outcomes for children in Jamestown, and advance healthcare and general well-being for the entire town.

Service Offerings

300/300 Mbps: \$50.20/month
